

## Cementing Plug Non Rotating - SH26

Available in 3 1/2" to 30 "sizes + any special sizes

Sledge Hammer Top & Bottom cementing plug have been designed to decrease drill out time. These series of cementing plug have reinforced locking teeth built into the plugs, which lock together between the plugs and the float equipment to eliminate rotation of the plug during drill out.

These plugs are made of Graded Rubber with Aluminum or Plastic core inside, No other metal parts are used and these plugs are completely PDC drillable.

Operating range of temperature with Aluminum core is up to 200 degree Fahrenheit. Plug can be ordered for higher operating temperature and operation in either synthetic or mud fluids.
