

"Polished Stinger"

Description

The stinger is a simple polished tubing section with an integral no-go to provide wash-pipe isolation to enable wash-down and protect screens from mud solids plugging. The standard length can be adapted to suit the application with shifting tool interface and based on expected tubing movement etc.

Application

Completion operation
Gravel pack operation

Features

Available in a variety of lengths and sealing ID to add flexibility to gravel pack operations and promote sand control completion productivity. Manufactured from material that comply with NACE standard for sulphide stress cracking resistance metallic materials

Benefits

Customisable and reliable

Technical Specification & Sizes

Various sizes, different threading & different materials are available. OD will vary with tubing weight and thread type.
